

Heavy and Light

The  is light.

The  is heavy.

Circle the heavier object and cross out the lighter one.

Teacher's Tips

Concept: Comparison of heavy and light

Introduction: To overcome the misconception that bigger the size, heavier the object, take two boxes of different sizes, and fill the smaller one with pebbles and the other one with cotton. Ask the children to hold the two boxes and compare the weights. Ask the children to bring a heavy and a light object from home. They could then talk about these objects—about their weight, colour, use, and so on.

Tall and Short

tall

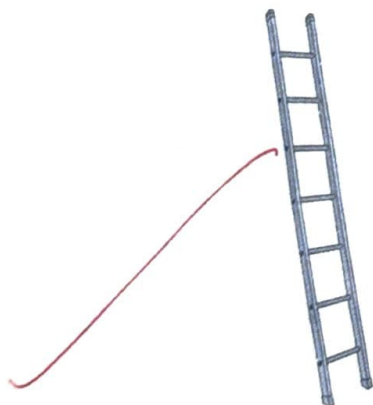

short

Tick (✓) the tall pictures and cross out (x) the short ones.

Draw a shorter ladder.

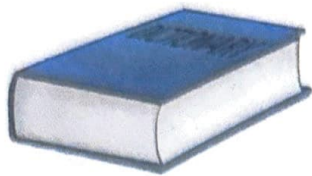

Teacher's Tips

Concept: Comparison of tall and short

Introduction: Compare the heights of two children and ask them who is taller. Ask them to find out who is taller—their mother or their father.

Thick and Thin

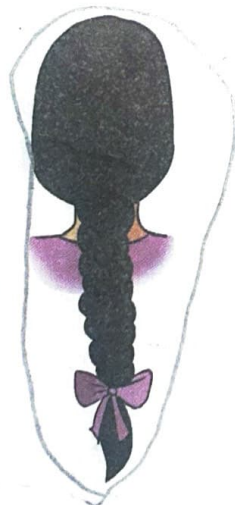

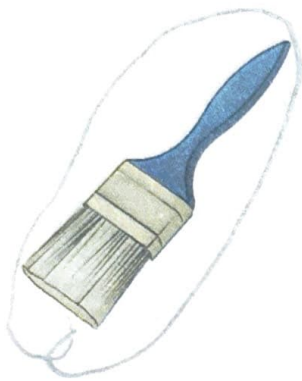

thick

thin

Circle the thicker object and cross out the thinner one.

Teacher's Tips

Concept: Comparison of thick and thin

Introduction: Show the children a thick book (dictionary) and a thin book. Ask them to hold both the books in their hands one by one. Tell them that the dictionary is thicker and the other book is thinner. You could also compare your wrist with a child's and ask the children whose wrist is thicker. You could also use a jumbo crayon and an ordinary crayon to clarify the concept further.

Long and Short

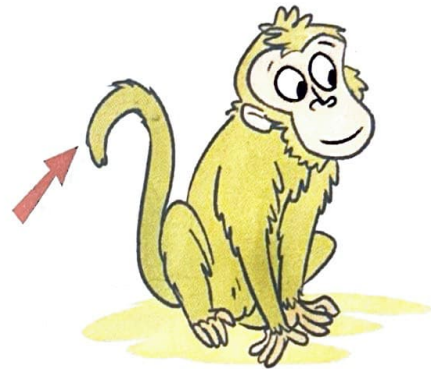

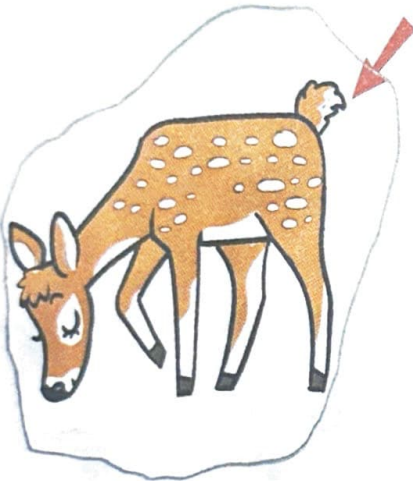

long neck

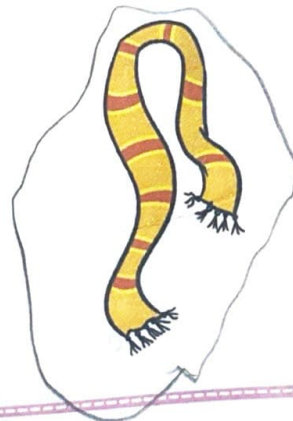

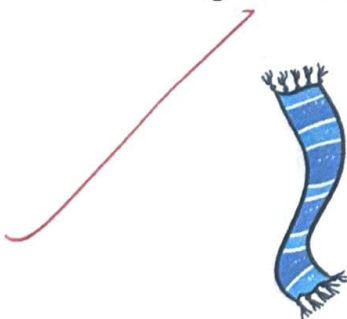

short neck

Circle the animal that has a short tail.

Circle the longer scarf.

Teacher's Tips

Concept: Comparison of long and short

Introduction: Give the children two lengths of straws and ribbons. Ask the children which one is longer or shorter. You can also introduce the concept by drawing lines on the blackboard.
