

More and Less

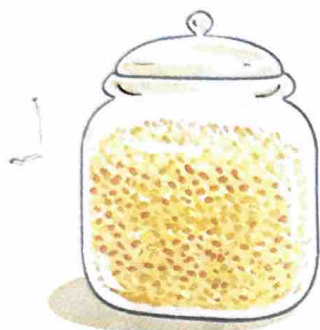

more juice

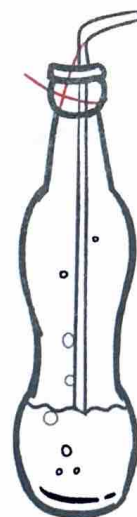

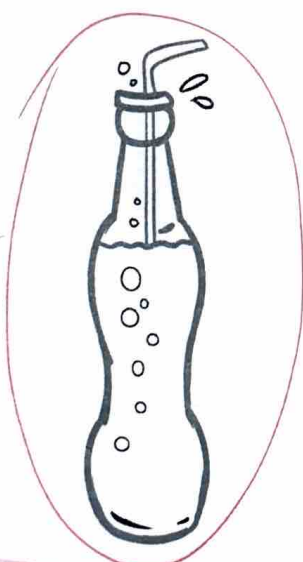

less juice

Tick (✓) the object that has more. Cross (x) out the object that has less.

Colour the bottle that has less.

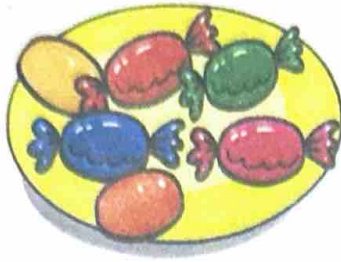

Teacher's Tips

Concept: Comparison of more and less

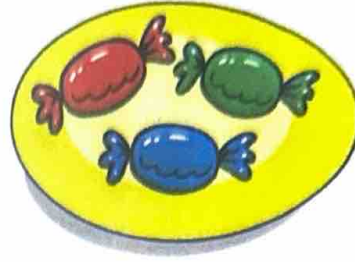

Introduction: Show two bottles to the students. One should have more water than the other. You could also elaborate further by using two ladles, and *thoor dal* or *channa* seeds. One ladle can have more of these items and the other less.

Few and Many

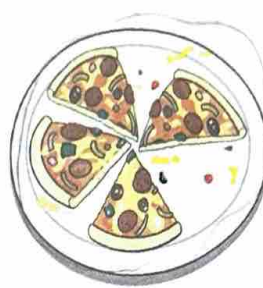

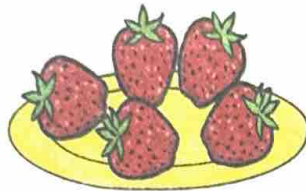

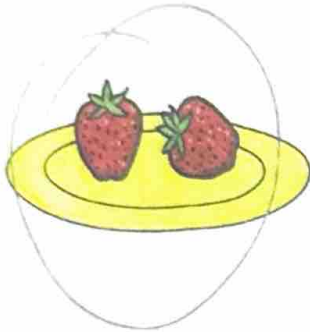

many chocolates

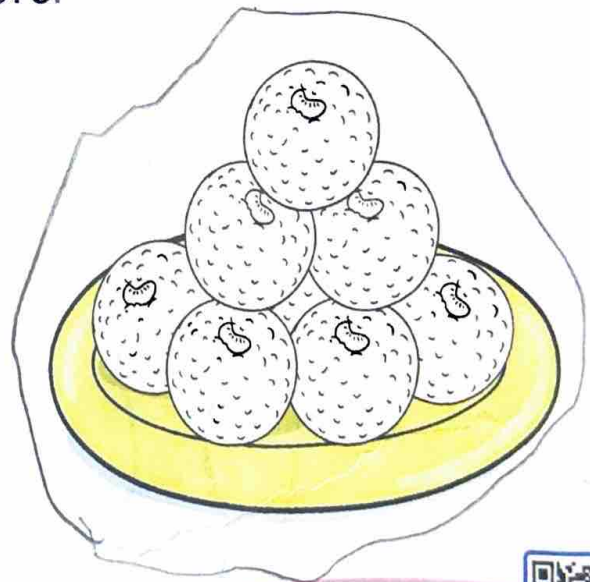

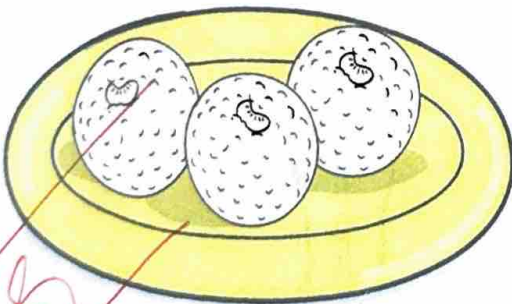

few chocolates

Circle the plate that has few.

Colour the laddoos that are more.

Teacher's Tips

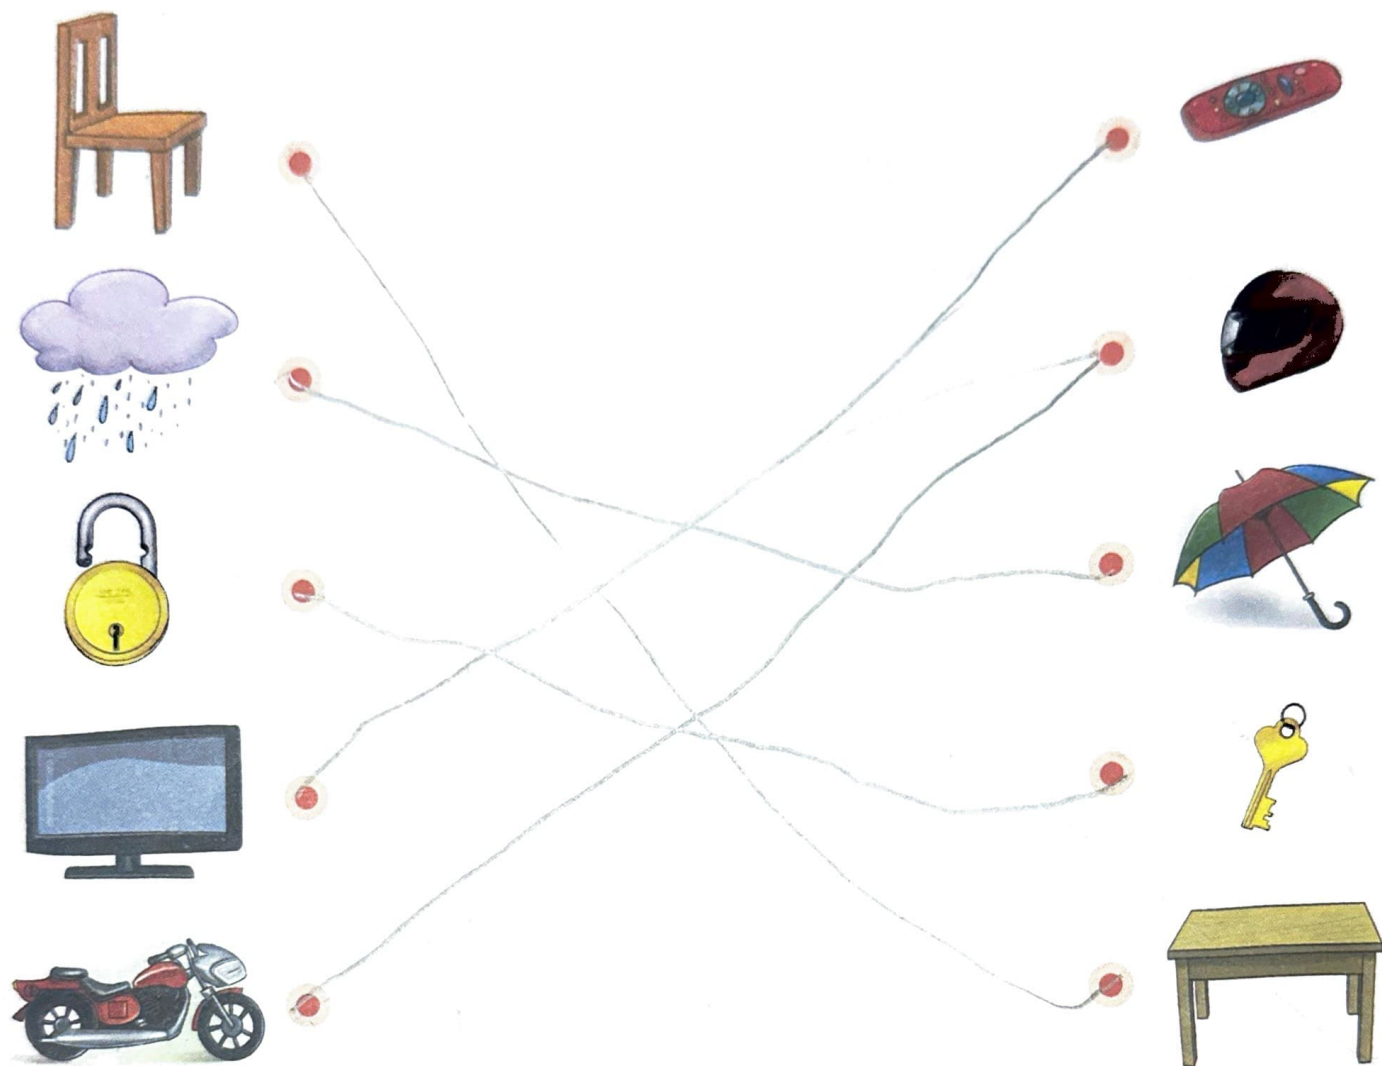

Concept: Comparison of few and many

Introduction: Make two groups of children. One group should have more children and the other should have less. Ask the children which group has fewer children. You could also pick up many crayons in one hand and few crayons in the other and ask the children to tell you which hand has many crayons.

We are Related!

Match the objects that go together. 

Teacher's Tips

Concept: Matching of objects that share some kind of a relationship

Introduction: Have pairs of objects that go together or can be used together (objects that share some kind of relationship) such as bowl and spoon, socks and shoes, pencil and eraser or pencil and notebook, paint and brush, and so on. Take out one item, and ask the children what can be used with it.

Grouping

Study the picture below and create various groups by circling them. 🖐️ 🦜

Teacher's Tips

Concept: Grouping of objects according to their common features

Introduction: Discuss the organization of the classroom—all the bags are on the shelf or on the benches, the chalks in a box, books on the shelf, toys in the basket, and so on. Display a set of chalks, crayons, pencils and erasers in a tray, and ask the children to group them suitably. Ask the children to form various kinds of groups, according to gender, height, dress colour, and so on.
